SHELVING ASSEMBLY

## Super Erecta® Shelving System

The original wire storage system.

A storage system that defines the extent of space, Super Erecta's revolutionary concept was fresh and innovative from its start — nearly 50 years ago. It has continued to evolve, with nearly 100 highly specialized accessories, aimed at meeting the diversity of today's challenges.

- Adjustable: Shelves can be set and repositioned at precise 1" (25mm) increments along the length of the numbered posts.
- Unique Design: Open-wire design minimizes dust accumulation, allows a free circulation of air, and greater visibility of stored items.
- Mobile: Full choice of caster types available for mobile applications.

SiteSelect posts provide a visual guide for positioning and adjusting shelves, saving considerable time during assembly and adjustment. An easy-to-identify double groove, every 8" (203mm), offers a quick way to align all shelves.

## Available Finishes

Wire & Solid

### Type 304 Polished Stainless Steel

Addresses the most aggressive applications and environments. All-stainless solid and wire options exist for high temperature automated cart wash and autoclave applications.

Green & Gray

### Metroseal™ Epoxy

Corrosion resistant finish for wet or high humidity environments with a 12-year warranty against rust and corrosion. Microban antimicrobial is built into the finish to keep the product "cleaner between cleanings."

### Chrome Plating

Nickel-chrome finish for dry, low humidity environments. Metro's durable chrome finish includes a protective lacquer coat.

### Brite

Economical, chromate finish for dry, low humidity environments. Metro's Brite finish provides the look of chrome and includes a protective lacquer coat.

## Standard Epoxy and Designer Finishes

A pleasing aesthetic and basic protection for dry environments.

## Available Posts

**Standard Stationary Post** with adjustable leveling foot. Stainless models also feature a stainless leveling foot. Use Foot Plates for greater stability.

**Standard Mobile-Ready Posts** accept Metro stem casters. Use these for the majority of standard duty transport and movable storage applications.

### Cart Wash and Autoclave Applications

Swaged stainless post has a fastened aluminum post cap and is specifically designed to withstand high temperatures. See page 59 for part numbers.

### Heavy Duty Transport

Staked post attaches to a dolly truck to address abusive transport applications. The reinforced connection between the base receptacle and post provides a more secure connection to the dolly truck. See page 60 for part numbers.

**Important:** In stationary shelving, stability decreases as the ratio of height to width increases and when heavier loads are placed on upper shelves. Shelving stability is attained by keeping units as wide and low as possible, and placing heavy loads low on the shelving unit.

### Cantilever Shelves — {10.05}

Adds convenient space above a storage unit. Drop mat design creates a retaining ledge around the entire 12" (305mm) deep shelf. Remember to order rear posts taller than front posts to accommodate these shelves.

## SUPER ERECTA® PLATE CASTERS

### Plate Casters — {11.37}

Use in conjunction with Metro "Made-to-Order" truck dollies to assemble a heavy-duty mobile base for your needs. Important: The caster plate style must be specified at the time of order — "B" or "C" plate. The dollies are modified at the factory prior to shipment.

**B-plate** casters offer good impact resistance for common thresholds.

4.75" (121mm)

**C-plate** casters offer the thickest metal chassis and largest wheels for the most abusive conditions and heaviest storage loads.

**Brake Lock/Swivel Lock Combination Casters — {11.37}**

Patented, foot-operated design enables a single pair of casters to serve as swivel, rigid or brake casters. Conveniently positioned on the dolly, not on the wheels, the downward pressure pedals prevent scuffing of shoes.

- **Convenient.** Pedals are on the dolly, not the wheels, making operation more convenient. Downward pressure on the pedals save shoes from scuffing.
- **Casters.** Long wearing polyurethane. Resists abrasion. Non-marking, shock absorbing. Wheels are available in 6" (152mm) and 8" (203mm) size.
- **Recommended Caster Selection.** Two swivel casters at one end and brake/swivel lock set at the other end. Other caster combinations can be used, however, including brake/swivel lock sets at both ends. Wraparound bumper recommended.

Note: Aluminum dust covers and tow bar assemblies are not compatible with the Brake Lock/Swivel Lock Combination casters.

When "Rigid" is engaged the swivel casters will lock into the trailing position for easy steering of heavy loads over long distances. When "Swivel" is engaged the caster set swivels freely for easier maneuvering.

When the "Brake" pedal is engaged both of the BL casters are locked. The cart remains still for loading and unloading.

**Important:** In stationary shelving, stability decreases as the ratio of height to width increases and when heavier loads are placed on upper shelves. Keep units as wide and low as possible, using the dunnage shelf as the bottom shelf. If two dunnage shelves are being used, both should be placed within the lower half of the unit.  
**Note:** Not compatible with Super Erecta or Super Adjustable Super Erecta components.

**Note:** A qwikSLOT shelf is rated at 300 lbs. (135kg) per shelf. A typical qwikSLOT unit is rated at 800 lbs. (375kg) capacity per unit. For higher unit capacities, an intermediate standard Super Erecta shelf must be installed approximately at mid-height on the unit.

Mobile posts come without leveling bolt assembly to accommodate stem casters. The qwikSLOT lock clip (9985QSL) is recommended for mobile applications.

Under normal conditions, aisle width of 30"-36" (760-914mm) is recommended. The storage of very large objects within the system, however, may require an aisle width larger than 36" (914mm).

\* If 18" wide mobile units are planned, the maximum allowable length shelf is 60" (1524mm) long. If 18" (457mm) wide by 60" (1524mm) long mobile units are planned, a maximum of five 18" (457mm) mobile units are allowable between two stationary units. 18" (457mm), 21" (530mm), 24" (610mm) wide mobile units can be intermixed in a given system.

### Track Sets Includes tracks and hardware needed to assemble runs up to 21' (6400mm).

#### Additional Notes:

- To accommodate bumpers, the actual size of a mobile unit is 2.5" (63.5mm) wider than the shelf width shown. For example, an 18" (457mm) wide unit is actually 20.5" (520mm).
- Recommended maximum load rating for a mobile unit is 900 lbs. (410kg). Floor should be level, smooth, and free from large cracks and raised obstacles.
- Added rigidity for heavily loaded systems. Super Erecta standard adjustment shelves provide the most rigid wire shelving mobile units; Recommended when configuring systems using 60" (1524mm) and 72" (1829mm) long shelves subject to the heaviest loads and frequent movement (multiple times daily).

#### Notes:

- Each stationary end and intermediate unit **must** have a minimum of four shelves. For all Super Adjustable applications, the top and bottom shelves must be non "quick adjust" Super Erecta shelves.
- The standard Double Deep Top-Track system requires the use of 86" (2185mm) posts (i.e., 86P) on the stationary end and intermediate units. **Shelves for the stationary end and intermediate units are sold separately.**
- The mobile unit kits include special 74" (1880mm) posts with casters. **Shelves for mobile units are sold separately.**
- Under normal conditions, an aisle width of 30"-36" (760-914mm) is recommended. The storage of very large objects within the system, however, may require an aisle width larger than 36" (914mm).
- Two intermediate shelving units connected end-to-end are required when the track length exceeds 21 feet (6400mm). Stationary intermediate shelving units may be used at the discretion of the user when track lengths are less than 21 feet (6400mm).
- The maximum Double Deep system configuration is 10'6" (3200mm) (i.e., two systems, each having 60" (1524mm) long shelves, plus 6" (150mm) for Top-Track components).
- Ease of reliability for the mobile units is an important consideration in evaluating Top-Track as a possible storage alternative. The floor should be level, smooth, and free from large cracks and raised obstacles. Two mobile shelving units connected end-to-end and loaded with between 800 to 1,200 lbs. (365-550kg) will require a human effort range (in lbs. of human force) of between 18-24 lbs. (8-11kg) to move the unit from a complete stop. Subjectively, an average 110 lb. (50kg) person will perceive this as acceptable effort levels. For loads over 1,200 lbs. (550kg), contact your Metro representative.
- Mobile units should have the top shelf positioned as close as possible to the track.
- To accommodate bumpers, the actual size of a mobile unit is 2.5" (63.5mm) wider than the shelf width shown. For example, an 18" (457mm) wide unit is actually 20.5" (522mm).
- To calculate the overall length of a Super Erecta Top Track System, add the following:  
Nominal track length + Nominal widths of each end unit + 1.5" (38mm).

## Getting started:

### Document the available floor space

- Actual length: Nominal track length + the nominal width of each end unit + 2" (51mm)
- Actual width: Nominal Shelf length + 3.5" (89mm)
- Actual height of system is approx. 87" (2210mm)

*It is recommended that the tracks are installed at least 5" (127mm) from the wall.*

## SEISMIC HIGH-DENSITY WIRE STORAGE — TOP-TRACK®

### Top-Track® with Seismic Base Plates

Components from Metro's **HCAI preapproval, OPM-0426**, may be used with standard Top-Track components to create systems with seismic anchorage points.

Metro Top-Track is not part of the current OPM-0426 preapproval, but the configurations can be used to earn site specific approvals. Configurations should be reviewed with the "engineer of record" or local inspector prior to the sale and installation to assure the configuration meets the requirements of the local jurisdiction.

#### End Unit Kits:

Seismic posts (86") and base plate kits from **OPM-0426** would be used in place of the regular Top-Track posts and foot plates.

Mobile units and Overhead Tracks are the standard Top-Track options.

### MetroMax® Top-Track®

Top-Track® Wall Mount Bracket

**Top-Track™ Wall Mount Bracket — {11.12}**

Used to attach one set of tracks to the wall. Eliminates the need for a stationary end unit. Includes one pair of wall brackets and hardware to attach tracks to the wall brackets. Hardware to attach the wall brackets to the wall is NOT included.

Cat. No. TTWM

Top-Track® Stop Plate Kit

**Top-Track™ Stop Plate Kit — {11.12}**

Used in conjunction with the Wall Mount Bracket Kit. The stop plates bolt to the underside of the track next to the wall brackets to prevent the mobile units from bumping into the wall.

Cat. No. TTSTP

**Metro Tip:**

Floor pad protectors compensate for soft flooring materials by protecting the floor from wear and tear. For new construction projects, it is recommended that flooring of suitable durability is used in areas where Top-Track will be installed.

qwikTRAK Stop Plate Kit

**qwikTRAK Stop Plate Kit — {11.15}**

Eliminates the need for a stationary end unit. The kit contains two "L-shaped" stop plates that mount to the ends of the floor tracks. The stop plates prevent a mobile unit from rolling off the end of the tracks. Cat. No. BTSP

Consult your Metro representative for guidance on configuring a qwikTRAK system using this kit. Stop plates (kit of two) shown mounted to the end plates on the floor tracks.

Super Erecta Hi-Rise Shelving

## Super Erecta® Hi-Rise Shelving — {10.17}

- For light-duty storage applications where floor space is at a premium.
- Construct shelving up to 24 feet (7315mm) high — 3 times the height of conventional shelving
- Metro's computerized engineering system assures correct specifications and load rating of Hi-Rise materials for your application.

All Hi-Rise installations must be reviewed and approved by Metro Engineering. Hi-Rise certification plate supplied. Only Super Erecta and Super Adjustable Super Erecta wire shelves can be used in Hi-Rise applications. Contact Metro customer service or your local Metro representative for details.

### Metro Tip:

One frequently overlooked opportunity to gain additional storage capacity is the efficient use of vertical space. By connecting Super Erecta posts, storage areas may be created that utilize every available cubic foot of unused vertical air space.

**Material part numbers will be provided by Metro Product Development upon review of application.**

**A secure mounting connection combined with robust Metro shelving.**

- Low profile base plates.
- No drilling of posts.
- Flexible hardware placement
- Easy to install.
- Easy to level.

**OPM-0426**

HCAI (OSHPD) Preapproval **OPM-0426** specifically outlines the configuration requirements for HCAI (OSHPD) governed healthcare facilities in the state of California subject to the 2019 California Building Codes. (Note: These requirements may vary in different jurisdictions.)

**The HCAI0 Preapproval outlines the following:**

**Weight Loads (for installations subject to HCAI Preapproval)**

20 PSF/tier for a shelving unit. The maximum load bearing of a shelving unit is defined as a five tier unit with four storage tiers and an open top shelf (no load).

Example 1: 24x48x74, 4-tier unit. Maximum load bearing per shelf is 20 lbs. x 8 sq ft = 160 lbs. The total unit is rated using this formula: 4 tiers x 160 lbs. per tier = 640 lbs.

Example 2: 24x48x74, 6-tier unit. Maximum load bearing per 24x48 unit is 640 lbs. A 6-tier unit is defined to have 5 storage tiers, and an open top shelf. 640 lbs. / 5 tiers = 128 lbs. per tier.

**Positioning of bottom shelf:** maximum of 10" (254mm) from the floor.

**Seismic Zones are called out within OPM-0426.**

**Anchorage Bolts:** Metro does not provide the concrete floor anchorage bolts. The engineer of record for a site specific job must verify that the building structure is adequate for the applied load.

**Supporting Information can be found on Metro.com**

## Configuring Basic Task Stations

### Selecting Wall Tracks

Wall track or combination of tracks must be at least 2" (51mm) longer than the desired span of shelves. 1" (25mm) on each end of the span of tracks is reserved for hardware that acts as a stop. (Example: If 152" (3860mm) of wall track could be mounted, then the length of a shelf tier cannot exceed 150" (3810mm).

### Grids

Grids may attach directly to the uprights. Grids may not overhang the uprights by more than 6" (152mm). When uprights are not used, select the appropriate grid bracket kit based on the configuration.

### Uprights and Shelf Supports

Enable standard Super Erecta, Super Erecta Pro, MetroMax Q, and MetroMax i shelves to be used as part of the task station.

### Combinations of Grids and Shelves

Grids can be mounted directly behind shelves, but shelf supports and grids cannot occupy the same slots on the upright. Once the grid has been mounted to the upright, the shelf support can be mounted to its own slots and can be adjusted on 3" (76mm) increments within the grid space.

## Configuring Basic Wall Shelving

### Selecting Wall Tracks.

Wall track or combination of tracks must be at least 2" (51mm) longer than the desired span of shelves. 1" (25mm) on each end of the span of tracks is reserved for hardware that acts as a stop. (Example: If 152" (3860mm) of wall track could be mounted, then the length of a shelf tier cannot exceed 150" (3810mm).

### Uprights.

15" (381mm) uprights: 1 shelf tier maximum  
 30" (762mm) uprights: 3 shelf tiers maximum  
 45" (1143mm) uprights: 4 shelf tiers maximum

### Shelves.

When configuring side-by-side shelving units, the adjacent shelves on the same tier must have the same depth. Minimum space between shelf tiers is 9" (229mm).

Note: When using MetroMax i shelves with SmartWall shelf supports, order one adapter kit per shelf (Cat. No. M9997-4).

### Shelf Supports.

Order to match up with the depth of the shelf.

### Shelves

SmartLever's ultimate flexibility comes from the integration of standard Metro Shelving. All Super Erecta (round post) shelves work with SmartLever's shelf mounting hooks.

1. Select Super Erecta Pro shelving for all-around superior performance in all environments based on it's easy-to-clean removable mat designs and inherent corrosion protection.
2. Choose Super Erecta for basic applications. Metroseal is recommended but all wire shelving finishes are compatible
3. Utilize Super Erecta Solid Shelving for hybrid work surfaces, work surface overhead shelves, or whenever spill mitigation is important. Stainless steel is recommended for use with SmartLever but all solid shelving styles are compatible
4. Super Erecta Dunnage hold heavy loads supported on SmartLever's Legs with the use of Single or Double Leg Hooks (also for use with other style shelves mounted on the Legs of the unit). Dunnage shelves hold 1,000 lbs. when mounted to Legs using Leg Hook (must order separately – see below) and 600 lbs. when mounted to Arms.

# Worktables.

## What Type of Stainless Steel Do I Need?

The difference between 304 and 316 stainless steel is the chemical composition, with 316 containing a significant amount of molybdenum. The higher molybdenum content results in increased corrosion resistance. 316 stainless steel work surfaces are ideal for pharmaceutical manufacturing, medical, biomedical, life sciences and sterile applications where there is repeated use of harsh cleaning solutions or chloride solutions.

# What is Microban Antimicrobial Technology?

An antimicrobial is an additive placed into a product during the manufacturing process. By placing this additive, the product receives protection from microorganisms like bacteria, mold, mildew, and fungi. These organisms are known to cause odor and stains if not appropriately inhibited. By pairing your product with Microban Antimicrobial Technology, you reduce damaging bacteria and improve the lifespan of your product.

Microban Antimicrobial Protection works 24/7 to create an unlivable environment for microbes while helping to improve the appearance of the product by preventing stains and odor caused by bacterial build up. On an unprotected surface, bacteria can double in number every 20 minutes, leading to a full infestation in no-time, but with Microban antimicrobial technology, you can rest assured that your product remains cleaner between cleanings.

## What are the benefits of a product with Microban antimicrobial protection?

- Helps prevent the growth of bacteria, fungi, mold, and mildew
- Keeps surfaces visibly cleaner
- Keeps products "cleaner between cleanings."
- Makes cleaning products easier
- Keeps surfaces cleaner longer after cleaning
- Will never wear down, as it is incorporated into the materials of the product
- Lasts the life of the product

(2) Water Reservoir **EMPTY**

\* NOTE: Recommended Humidity Set point. Readout will display relative humidity inside the cabinet based on actual conditions and may vary from set point based on door opening, quantity and temperature of food, and moisture content of food. Use feedback to vary settings as required for individual products and desired results.

\*\* NOTE: When Relative Humidity is set to OFF the cabinet will not generate additional humidity but will continue to display the actual relative humidity inside the cabinet. To reduce humidity further, increase the temperature setting and/or drain the water reservoir.

## Armour Panels

Panels have molded-in handles and act as a full-body bumper for improved handling and protection in mobile applications.

## Slides

Two systems to choose from that hold a variety of pan sizes. Universal option for maximum pan flexibility or lip load to maximize 18x26 sheet pan capacity.

## Heavy-Duty Door & Hinges

Field reversible stainless steel door with 2" thick high-density fiberglass insulation and 11-gauge stainless steel hinges.

## Top-Mounted Controls

Ergonomic, user-friendly controls are mounted at the top of the cabinet for improved access, to help prevent damage, and easy cleaning.

The most important consideration when choosing a heated holding cabinet is the food. Many foods, in particular proteins, hold best in a moist environment. The Moisture Module option for the C5 3 Series delivers 5 times the moisture-generating power of a standard “dry” cabinet at a price far below that of conventional high-humidity alternatives. Metro delivers the ability to assure food safety and improve food quality in a “game changing” design. The Moisture Module inside an Insulation Armour cabinet is a one-of-a-kind product, and an unbelievable value!

### What's the secret to increasing holding power?

- The secret to Metro's space-saving advantage is Drop Mat's "thin shelf" design ( $1/4"$  versus  $1 1/2"$ ). Drop Mat eliminates the need for space robbing under-shelf supports and bulky shelf brackets, reclaiming 20% of your merchandising space.
- Back-to-back, Drop Mat saves yet more space. Reclaim up to 10% additional space by eliminating traditional gondola's 4" wide center support structure.

All typographical or clerical errors made by Seller in any quotation, acknowledgment or publication are subject to correction.

The validity, performance, and all other matters relating to the interpretation and effect of this agreement shall be governed by the law of the Commonwealth of Pennsylvania. Buyer

Buyer agrees that all applicable import, export control and sanctions laws, regulations, orders and requirements, as they may be amended from time to time, including without limitation those of the United States, the European Union and the jurisdictions in which Seller and Buyer are established or from which items may be supplied, and the requirements of any licenses, authorizations, general licenses or license exceptions relating thereto will apply to its receipt and use of hardware, software, services and technology. Buyer agrees furthermore that it shall not engage in any activity that would expose Seller or any of its affiliates to a risk of penalties under laws and regulations of any relevant jurisdiction prohibiting improper payments, including but not limited to bribes, to officials of any government or of any agency, instrumentality or political subdivision thereof, to political parties or political party officials or candidates for public office, or to any employee of any customer or supplier. Buyer agrees to comply with all appropriate legal, ethical and compliance requirements. To the extent applicable, and except to the extent otherwise required by applicable law, Seller shall have no responsibility for the collection, treatment, recovery or disposal of (i) the Goods or any part thereof when they are deemed by law to be 'waste' or (ii) any items for which the Goods or any part thereof are replacements. If Seller is required by applicable law, including waste electrical and electronic equipment legislation, European Directive 2002/96/EC (WEEE) and related legislation in EU Member States, to dispose of 'waste' Goods or any part thereof, Buyer shall, unless prohibited by applicable law, pay Seller, in addition to the Contract Price, either (i) Seller's standard charge for disposing of such Goods or (ii) if Seller does not have such a standard charge, Seller's costs (including all handling, transportation and disposal costs and a reasonable mark-up for overhead) incurred in disposing of such Goods. GOODS AND SERVICES PROVIDED HEREUNDER ARE NOT SOLD OR INTENDED FOR USE IN ANY NUCLEAR OR NUCLEAR RELATED APPLICATIONS. Buyer (i) accepts Goods and Services in accordance

with the foregoing restriction, (ii) agrees to communicate such restriction in writing to any and all subsequent purchasers or users and (iii) agrees to defend, indemnify and hold harmless Seller and Seller's Affiliates from any and all claims, losses, liabilities, suits, judgments and damages, including incidental and consequential damages, arising from use of Goods and Services in any nuclear or nuclear related applications, whether the cause of action be based in tort, contract or otherwise, including allegations that the Seller's liability is based on negligence or strict liability.
